(a) Without Recalibration (The Paradox)
Unpruned Dense Target
Stale Normalized Activations
Negative (Clamped to 0)
96.2% Signals
Clamped to Zero!
(Feature Collapse)
Empirical Probability Density
Pre-ReLU Activation Value (layer4)
(b) With O(1) Recalibration (SMR)
Unpruned Dense Target
SMR Recalibrated Activations
Active Forward Signal
Signal Flow Restored
O(1) Recalibration
(22.1% -> 77.5%)
Empirical Probability Density
Pre-ReLU Activation Value (layer4)
